TECHNOLOGY AND STYLE OUTSIDE THE BOX

60 knots in safety and comfort!

The key to the AB 100 Superfast's performance is her waterjet propulsion.

She is fitted with 3 MTU engines 2,600 hp each coupled with 2 steerable MJP waterjets and a central booster jet.

Underway, the yacht feels solid, safe, and stable in the water. She accelerates smoothly and moves well at all speeds, even at a maximum. And what's more, she does it all effortlessly with minimal noise and no vibration and with outstanding manoeuvrability. This waterjet setup, combined with construction technique and a very special, highly engineered hull, provides a wide range of speeds, with remarkably effects on fuel efficiency, too.

Comfort both underway and at anchor is further enhanced by a Seakeeper gyro stabilizer that offers an 85% reduction in roll, optimising cruising in any and all sea conditions, and a

draft of 1.3m (4.3 ft) makes this yacht ideal for cruising in the shallow waters of Florida or the Bahamas.

The AB 100 Superfast means you can go further and discover more in less time. For example, you can go from Portofino to St Tropez in a couple of hours; and also, from downtown Miami to Cat Cays in the Bahamas in 45 minutes, or from New York City to The Hamptons in less than two hours.
